100% Pass Microsoft 70-413 Exam At The First Time With Lead2pass Latest Real 70-413 Dumps (1-10)

Important Info: Now Lead2pass offer the latest 70-413 187q PDF and VCE dumps with New Version VCE Player for free download, and Lead2pass new 70-413 practice tests ensure your exam 100% pass. QUESTION 1 Your company has a remote office that contains 1,600 client computers on a single subnet. You need to select a subnet mask for the network that will support all of the client computers. The solution must minimize the number of unused addresses. Which subnet mask should you select? A. 255.255.248.0 B. 255.255.252.0 C. 255.255.254.0 D. 255.255.240.0Answer: A Case Study 1 - Proseware, Inc (Question 2 - Question 10) Overview General Overview Proseware, Inc. is a pharmaceutical services company that has a sales department, a marketing department, an operations department, and a human resources department. Physical Locations Proseware has two main offices. One of the offices is located in New York. The other office is located in Chicago. The New York office uses a 172.16.1.0/24 network ID. The Chicago office uses a 192.168.1.0/24 network ID. The offices connect to each other by using a high-bandwidth, low-latency WAN link. Each office connects directly to the Internet. Existing Environment The network contains an Active Directory forest named proseware.com. The forest contains two domains named proseware.com and chicago.proseware.com. All of the user accounts and the computer accounts in the New York office reside in the proseware.com domain. All of the user accounts and the computer office is configured as an Active Directory site. The network ID for each office is associated to the appropriate site.
Each office contains two domain controllers. The domain controllers were recently upgraded from Windows Server 2008 R2 to Windows Server The functional level of the domain and the forest is Windows Server 2003. The company uses Active Directory user attributes to store the personal information of its employees in custom attributes. Existing Servers The relevant servers are

configured as shown in the following table.

Server name	Role	Site
DC01	Domain controller DNS server DHCP server	New York
DC02	Domain controller DNS server	New York
WDS01	Windows Deployment Services (WDS) server	New York
Host01	Hyper-V host	New York
Host02	Hyper-V host	New York
Host03	Hyper-V host	New York
RAS01	Remote access server	New York
File01	File server	New York
DC03	Domain controller DHCP server	Chicago
DC04	Domain controller	Chicago
Host04	Hyper-V host	Chicago
Host05	Hyper-V host	Chicago
Host06	Hyper-V host	Chicago
RAS02	/ Fietrole access server	Cetricage C C
File02	File server	Chicago

All servers run Windows Server 2012 R2. DC01 has an IPv4 scope. The starting IP address in the range is 172.16.1.100 and the ending address is 172.16.1.199. DC03 has an IPv4 scope. The starting IP address in the range is 192.168.1.100 and the ending IP address is 192.168.1.199. There are no exclusion ranges configured on DC01 or DC03. Requirements Planned Changes Proseware plans to implement the following changes: - Deploy a read-only domain controller (RODC) to the London office. - Give users remote access to both offices by using a VPN connection from their laptop or tablet. - If DC01 fails, ensure that the computers in the New York office can receive IP addresses within 30 minutes. - In the New York site, deploy two 50-TB, Fibre Channel SAN disk arrays. Offloaded Data Transfer (ODX) will be used on both storage arrays. The Hyper-V hosts will use the new SANs for virtual machine storage. - Open three additional offices in Montreal, Atlanta, and London. The offices will connect to each other by using a high-bandwidth, low-latency WAN link. Each office will connect directly to the Internet. - For legal reasons,

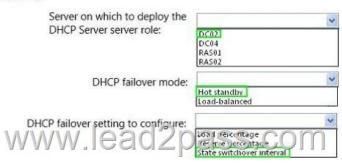

the Montreal site will have its own forest named montreal.proseware.com. - The Montreal and Atlanta offices will have local IT administrators to manage the network infrastructure of their respective office. The London office will not have a local IT staff. Each office will have approximately 50 client computers. Technical Requirements Proseware identifies the following technical requirements: - Users in the Montreal office must only be allowed to access shares that are located on File01 and File02. The Montreal users must be prevented from accessing any other servers in the proseware.com forest regardless of the permissions on the resources, - Users in the New York office must be able to reconnect to the remote access VPN servers automatically. Users in the Chicago office must use SSL to connect to the remote access VPN servers. - Domain controllers that run Windows Server 2012 R2 and Windows Server 2008 R2 must be able to be deployed to the proseware.com domain. Administrators in the New York office must be able to restore objects from the Active Directory Recycle Bin. - The DNS servers must be prevented from overwriting the existing DNS entries that have been stored in cache. - Each DNS server must be managed by an administrator from the same office as the DNS server. - The required time to create new fixed virtual hard disks (VHDs) on the SANs must be minimized. - The remote access servers must be able to restrict outgoing traffic based on IP addresses. - All certificates must be deployed to all of the client computers by using auto- enrollment. - All of the DHCP Server server roles must be installed on a domain controller. -Only one DHCP server in each site must lease IP addresses at any given time. - DHCP traffic must not cross site boundaries. RODCs must not contain personal user information. QUESTION 2 Hotspot Question You need to recommend a configuration for the DHCP infrastructure. What should you recommend? To answer, select the appropriate options in the answer area.

DHCP:

DH

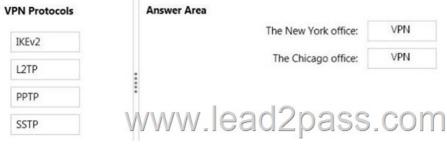

Answer: Answer Area

content,

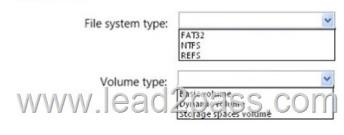

QUESTION 3 You need to recommend a trust model. What should you include in the recommendation?

A. A one-way, forest trust that has selective authentication. B. A one-way, external trust C. A two-way, external trust D. A one-way, forest trust that has domain-wide authentication. Answer: A Explanation: From case study: Users in the Montreal office must only be allowed to access shares that are located on File01 and File02. The Montreal users must be prevented from accessing any other servers in the proseware.com forest regardless of the permissions on the resources. QUESTION 4 Drag and Drop Question You need to recommend the VPN protocols for Proseware. What should you recommend? To answer, drag the appropriate VPN protocols to the correct offices. Each protocol may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view

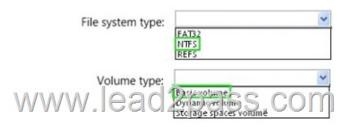

QUESTION 5 Hotspot Question You need to recommend a storage configuration for the Hyper-V hosts. What should you recommend? To answer, select the appropriate options in the answer area. **Answer Area**

Answer: Answer Area

QUESTION 6 You need to recommend a deployment method for Proseware. What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer. A. a WDS Deployment server and Multicast transmissions

B. a WDS Transport server and Multicast transmissions

D. a WDS Transport server and Multicast transmissions

D. a WDS Transport server and Unicast transmissions Answer: A QUESTION 7 You need to recommend a solution for the remote access servers. What should you include in the recommendation? A. Network address translation (NAT)

B. Logging levels

C. Packet filtering

D. Packet tracing

Answer: A QUESTION 8 Drag and Drop Question You need to recommend changes for the Active Directory infrastructure. What should you recommend? To answer, drag the appropriate domain and forest functional levels for proseware.com to the correct locations. Each functional level may be used once, more than once, or not at all. You may need to drag the split bar between

correct locations. Each functional level may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Functional Levels Answer Area

Windows Server 2008
Windows Server 2008 R2
Windows Server 2012
Windows Server 2012 R2

Answer Area

Domain functional level for proseware.com: Functional level
Forest functional level for proseware.com: Functional level

Windows Server 2012 R2

Answer Area

Domain functional level for proseware.com: Functional level

Windows Server 2012 R2

Answer:

QUESTION 9 You run the Get-DNSServercmdlet on DC01 and receive the following output:

IsReverseLookupZone False
IsDsIntegrated True
IsReadOnly False
MaxNegativeTtl 00:15:00
ZoneName .
MaxTtl 1.00:00:00
StoreEmptyAuthenticationResponse True
ZoneType Cache
IsPaused False
IsShutdown False
DistinguishedName DC=RootDNSServers,cn=
EnablePollutionProtection True
LockingPercent 50

ServerCache:

You need to recommend changes to DC01. Which attribute should you recommend modifying? A. EnablePollutionProtection B. isReadOnly C. Locking Percent D. ZoneType Answer: C QUESTION 10 You need to recommend a solution for the RODC Which attribute should you include in the recommendation? A. systemFlags B. searchFlags C. policy-Replication-Flags D. flags Answer: B Do not you know how to choose the 70-413 exam dumps? Being worried about your 70-413 exam?
