# [2017 New Free Lead2pass Microsoft 70-533 Exam Questions Download (136-150)

 2017 June Microsoft Official New Released 70-533 Dumps in Lead2pass.com! 100% Free Download! 100% Pass Guaranteed!  We are all well aware that a major problem in the IT industry is that there is a lack of quality study materials. Our exam preparation material provides you everything you will need to take a certification examination. Our Mirosoft 70-533 Exam will provide you with exam questions with verified answers that reflect the actual exam. These questions and answers provide you with the experience of taking the actual test. High quality and value for the 70-533 Exam. 100% guarantee to pass your Mirosoft 70-533 exam and get your Mirosoft certification. Following questions and answers are all new published by Microsoft Official Exam Center:

http://www.lead2pass.com/70-533.html  QUESTION 136Hotspot QuestionYou have an Azure Web App that uses the URL contoso.azurewebsites.net. The virtual IP address of the web app is subject to change.Users must be able to navigate to a custom domain name to access the Web App. You set up the DNS records for a custom domain at a third party registrar.You need to configure the web app to use the custom domain name.For each mapping, which DNS record type should you create? To answer, select the appropriate DNS record type from each list in the answer area.Answer:    Explanation:

https://azure.microsoft.com/en-gb/documentation/articles/web-sites-custom-domain-name/ QUESTION 137You deploy a web application to an Azure Cloud Service. The application uses a storage account that contains a large number of storage objects.You need to grant clients access to application data for a specified interval of time while minimizing effort.What should you create? A.  a stored access policyB.   a service shared access signatureC.   an account shared access signatureD.   a network security group Answer: CExplanation:https://azure.microsoft.com/en-gb/documentation/articles/storage-dotnet-shared-access-signature-part-1/ QUESTION 138Hotspot QuestionYou have a virtual machine (VM) that must be secured. Direct access to the VM is not permitted. You create the following Azure PowerShell script. Line numbers are included for reference only.  You assign the virtual network to the variable $vnet. You assign the subnet to the variable $backendSubnet. For each of the following statements, select Yes if the statement is true.Otherwise, select No.  Answer:    QUESTION 139You have an Azure subscription that contains a backup vault named BV1. BV1 contains five protected servers. Backups run daily. You need to modify the storage replication settings for the backups.What should you do first? A.   Create a new backup vault.B.    Run the Remove-OBPolicy cmdlet. C.   Configure the backup agent properties on all five servers.D.    Run the Remove-OBFileSpec cmdlet. Answer: CExplanation:

https://azure.microsoft.com/en-gb/documentation/articles/backup-azure-backup-cloud-as-tape/ QUESTION 140Drag and Drop QuestionYou manage an Azure virtual network environment for a company that has an office in Boston. The company plans to open a new office location in Paris.You must replicate the Boston virtual network environment in Paris.How should you complete the relevant Azure PowerShell commands? To answer, drag the appropriate Azure PowerShell segment to the correct location. Each Azure PowerShell segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  Answer:    QUESTION 141You manage an Azure virtual network that hosts 15 virtual machines (VMs) on a single subnet, which is used for testing a line of business (LOB) application. The application is deployed to a VM named TestWebServiceVM.You need to ensure that TestWebServiceVM always starts by using the same IP address. You need to achieve this goal by using the least amount of administrative effort.What are two possible ways to achieve the goal? Each correct answer presents a complete solution. A.   Run the following Azure PowerShell cmdlet:Set-AzureStaticVNetIPB.   Use the Azure portal to configure TestWebServiceVM.C.   Run the following Azure PowerShell cmdlet:Get-AzureReservedIPD.   Use RDP to configure TestWebServiceVM. Answer: ABExplanation:https://msdn.microsoft.com/en-us/library/azure/dn722490.aspx QUESTION 142Hotspot QuestionYou deploy an Azure Web App named ContosoApp.You configure a Traffic Manager profile for ContosoApp.You need to create the required DNS record to redirect queries to ContosoApp from the Internet. The solution must ensure that remote users can connect to ContosoApp by using the https://webservice.contoso.com URL.Which DNS record should you create? To answer, select the appropriate options in the answer area.  Answer:  Explanation:

https://azure.microsoft.com/en-gb/documentation/articles/web-sites-traffic-manager- custom-domain-name/ QUESTION 143Hotspot QuestionYou manage a web application named Contoso that is accessible from the URLhttp://www.contoso.com.You need to view a live stream of log events for the web application.How should you configure the Azure PowerShell command? T answer, select the appropriate Azure PowerShell segment from each list in the answer area.  Answer:  Explanation:

https://msdn.microsoft.com/en-us/library/azure/dn495187.aspx QUESTION 144Drag and Drop QuestionAn organization has several web applications and uses Azure Active Directory (Azure AD).You are developing a new web application that supports sign-on using the WS-Federation to Azure AD.You need to describe the authentication process flow to your team.In which order are the actions performed? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Answer:  Explanation:https://azure.microsoft.com/en-gb/documentation/articles/active-directory-authentication-scenarios/
QUESTION 145You host an application on an Azure virtual machine (VM) that uses a data disk. The application performs several input and output operations per second.You need to disable disk caching for the data disk.Which two actions will achieve the goal? Each answer presents a complete solution. A.    Use the Azure Resource Manager REST APIB.    Use the Service Management REST API.C.    Run the following Windows PowerShell cmdlet: Remove-AzureDataDiskD.    Run the following Windows PowerShell cmdlet: Set-AzureDataDisk Answer: ADExplanation:http://msdn.microsoft.com/en-us/library/azure/jj157190.aspx
QUESTION 146You are developing a REST API service that provides data about products.The service will be hosted in an Azure virtual machine (VM). The product data must be stored in Azure tables and replicated to multiple geographic locations. API calls that use the HTTP GET operation must continue to function when the data tables at the primary Azure datacenter are not accessible.You need to configure storage for the service.Which type of replication should you choose? A.    Locally Redundant Storage replicationB.    Geo-Redundant Storage replicationC.    Zone-Redundant Storage replicationD.    Read-Access Geo-Redundant Storage replication Answer: D QUESTION 147You are migrating an existing solution to Azure.The solution includes a user interface tier and a database tier. The user interface tier runs on multiple virtual machines (VMs). The user interface tier has a website that uses Node.js. The user interface tier has a background process that uses Python. This background process runs as a scheduled job. The user interface tier is updated frequently. The database tier uses a self-hosted MySQL database. The user interface tier requires up to 25 CPU cores.You must be able to revert the user interface tier to a previous version if updates to the website cause technical problems. The database requires up to 50 GB of memory. The database must run in a single VM.You need to deploy the solution to Azure. What should you do first? A.    Deploy the entire solution to an Azure website. Use a web job that runs continuously to host the database.B.    Deploy the database to a VM that runs Windows Server on the Standard tier.C.    Deploy the entire solution to an Azure website. Run the database by using the Azure data management services.D.    Deploy the user interface tier to a VM. Use multiple availability sets to continuously deploy updates from Microsoft Visual Studio Online. Answer: C QUESTION 148You are designing a Windows Azure application that will use Windows Azure Table storage.You need to recommend an approach for minimizing storage costs.What should you recommend? A.    Use Entity Group Transactions.B.    Use multiple partitions to store data.C.    Use a transaction scope to group all storage operations.D.    Use Microsoft Distributed Transaction Coordinator (MSDTC). Answer: A QUESTION 149You are designing an application that will use Windows Azure Table storage to store millions of data points each day.The application must retain each day's data for only one week. You need to recommend an approach for minimizing storage transactions.What should you recommend? A.    Use a separate table for each date. Delete each table when it is one week old.B.    Use a separate table for each week. Delete each table when it is one week old.C.    Use a single table, partitioned by date. Use Entity Group Transactions to delete data when it is one week old.D.    Use a single table, partitioned by week. Use Entity Group Transactions to delete data when it is one week old. Answer: A QUESTION 150You are designing a Windows Azure application that will store data in two SQL Azure databases. The application will insert data in both databases as part of a single logical operation. You need to recommend an approach for maintaining data consistency across the databases.What should you recommend? A.    Execute database calls on parallel threads.B.    Wrap the database calls in a single transaction scope.C.    Use Microsoft Distributed Transaction Coordinator (MSDTC).D.    Handle errors resulting from the database calls by using compensatory logic. Answer: D The Mirosoft 70-533 questions and answers in PDF on Lead2pass are the most reliable study guide for 70-533 exam. Comparing with others', our 70-533 dump is more authoritative and complete. We provide the latest full version of 70-533 PDF and VCE dumps with new real questions and answers to ensure your 70-533 exam 100% pass. 70-533 new questions on Google Drive: https://drive.google.com/open?id=0B3Syig5i8gpDeFgyaGRNaE5iaFk  2017 Microsoft 70-533 exam dumps (All 217 Q&As) from Lead2pass:  http://www.lead2pass.com/70-533.html [100% Exam Pass Guaranteed]
