QUESTION 24 Which of the following should a technician implement to prevent external contractors from physically plugging devices into the company's network jacks unless such jacks are designated for guest use? A. Disable DHCP and assign a static IP address to each network device physically connected to the network. B. Enable MAC address filtering across all network jacks and record the MAC address of guest devices. C. Disable all switch ports when they are not utilized and enable them on an as needed basis. D. Place guest network jacks in public areas and all other jacks in secure areas as needed.
Answer: C Explanation: The best way is to disable all switch ports when they are not utilized. Switch them on when you need them. This way, you can prevent external contractors from physically plugging devices in to company's network jacks.

QUESTION 25 After installing a new printer the organization determines that there are problems printing images and very large files. Which of the following will MOST likely resolve the issue? A. Update the drivers using WHQL drivers B. Install additional memory to each computer C. Install additional memory to the printer D. Apply the latest OS service pack
Answer: C Explanation: http://www.ehow.com/how_6875286_install-printer-memory.html

QUESTION 26 Which of the following command line tools will terminate a non-system process without restarting the computer? A. Shutdown B. Kill C. Erase D. Break
Answer: B Explanation:

http://www.tech-recipes.com/rx/446/xp_kill_windows_process_command_line_taskkill/

QUESTION 27 After accidentally removing a hard drive from a server with three drives in a RAID 5 configuration, a technician notices the server locks up and shuts down. Which of the following can the technician do to quickly fix the problem? A. Replace the RAID controller and boot. B. Reinsert the drive and boot. C. Plug the drive back in, the system will resume automatically. D. Remove all drives and rebuild the array.
Answer: B Explanation: Just reinsert the drive and boot the computer. The computer will start since it is a RAID 5 configuration.

QUESTION 28 A customer calls an IT consultant to explain an issue they are having with their Windows 7 Professional PC. Windows Update attempts to install patches upon each startup but fails on the same single update. The customer has attempted to re-run Windows Update from Control Panel but the issue remains. Which of the following courses of action would BEST resolve the problem? A. Running a full DEFRAG on the system B. Clearing the AppData temp folder entirely C. Clearing the Windows Update download cache entirely D. Uninstalling the Windows Update feature in Windows 7 and reinstalling it directly from the Microsoft website
Answer: C Explanation:
