

[Full Version Exam Collection 70-473 Dumps And 70-473 New Questions (11-20)]

[2017 March Microsoft Official New Released 70-473 Dumps in Lead2pass.com! 100% Free Download! 100% Pass Guaranteed!](#)

No doubt that 70-473 exam is a worth challenging task but you should not feel hesitant against the confronting difficulties.

Lead2pass is supplying the new version of 70-473 VCE dumps now. Get a complete hold on 70-473 exam syllabus through Lead2pass and boost up your skills. What's more, the 70-473 dumps are the latest. It would be great helpful to your 70-473 exam.

Following questions and answers are all new published by Microsoft Official Exam Center: <http://www.lead2pass.com/70-473.html>

QUESTION 11 Drag and Drop Question You need to recommend a solution to implement high availability for the Listings database.

Which three actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of

actions to the answer area and arrange them in the correct order. Answer: QUESTION 12 You need to recommend a solution to

migrate the Listings database to the cloud. What should you recommend? A. Stage the Listings database on an Azure virtual

machine prior to the outage. During the outage, perform a data import from the main office by using SQL Server Management

Studio. B. Enable mirroring between the main office and the Azure virtual machine. During the planned outage, change the

mirroring roles on the Azure virtual machine to become the primary server, and then break the mirror. C. Run a full backup during

the outage and restore the backup to the Azure virtual machine. D. Implement merge replication between the main office and the

Azure virtual machine. Answer: B Explanation:

QUESTION 13 Drag and Drop Question You need to back up the Listings database to meet the high-availability and recovery

requirements. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions

to the answer area and arrange them in the correct order. Answer: QUESTION 14 Drag and Drop Question You need to

implement the monitoring solution for the Listings database. Which three actions should you perform in sequence? To answer, move

the appropriate actions from the list of actions to the answer area and arrange them in the correct order. Answer: QUESTION 15

You are evaluating whether an Azure SQL Database elastic database pool suits your workload and usage patterns. What are two

possible ways to identify the elastic database transaction units (eDTUs)? Each correct answer presents a complete solution. A.

Aggregate data from sys.dm_os_wait_stats. B. Run the Database Engine Tuning Advisor. C. Run the Service Tier Advisor. D.

Aggregate data from sys.dm_db_resource_stats. E. Aggregate data from sys.dm_os_performance_counters. Answer: DE

QUESTION 16 You need to recommend a solution to migrate the Listings database to the cloud. What should you recommend? A.

Stage the Listings database on an Azure virtual machine prior to the outage. During the outage, perform a data import from the main

office by using SQL Server Management Studio. B. Implement log-shipping between the main office and an Azure virtual

machine prior to the migration date. During the planned outage, perform a final log backup, restore the backup to the secondary, and

then switch the secondary to the primary role. C. Run a full backup during the outage and restore the backup to the Azure virtual

machine. D. Implement merge replication between the main office and the Azure virtual machine. Answer: B Case Study 2 -

Contoso, Ltd. (QUESTION 17 - QUESTION 21) Overview General Overview Contoso, Ltd. is a national scientific research

company that has sales, marketing, and research departments. Contoso has a main office in Dallas and more than 20 satellite offices

across the United States. Some employees work off-site at customer locations. Contoso is expected to double in size during the next

two years. Existing Environment The Microsoft SQL Server environment contains the servers configured as shown in the following

table. Contoso currently uses SQL Server 2008 R2 on all of the database servers. SQL01 currently requires six cores and 50 GB of

memory. Once a day, database snapshots are taken on the mirror to provide ad hoc reporting and to load the data warehouse. One

report is used for ad hoc reporting by using the mirrored copy of the OLTP database. Research Gen II is a Windows application that

users currently access by using Remote Desktop. Requirements Business Goals Contoso identifies the following business goals:

Planned Changes Contoso plans to implement the following changes: Departmental Requirements Senior research project leaders

must be able to upload databases to the cloud. Initially, the databases will be less than 3 GB. Some databases may grow to 50 GB.

The databases must be recoverable to any point during the past two weeks. The research project leaders must monitor the

performance of their databases. They must view statistics, such as query performance and overall database performance. The

marketing department plans to use cloud services to host web applications for marketing campaigns. The databases for the web

applications have the requirements shown in the following table. Technical Requirements Contoso identifies the following

technical requirements: QUESTION 17 A solution for the data warehouse system must be created to provide disaster recovery

between SQL03 and an Azure virtual machine named SQL04. You are designing the data warehouse. You need to recommend a

solution that meets the business goals and the technical requirements. What should you recommend? A. Create an AlwaysOn

availability group between SQL03 and SQL04. B. Host the data warehouse on an Azure virtual machine. C. Create an Azure

HDInsight cluster. D. Create an Azure DocumentDB database. Answer: A QUESTION 18 A solution for the data warehouse system must be created to provide disaster recovery between SQL03 and an Azure virtual machine named SQL04. You are evaluating the use of active geo-replication for one of the research department databases. You need to identify which service tier to use for the database. The solution must meet the department requirements and the business requirements. What should you identify? A. Premium 1 B. Premium 14 C. Standard S0 D. Basic Answer: C Explanation: <https://azure.microsoft.com/en-gb/documentation/articles/sql-database-service-tiers/> QUESTION 19 A solution for the data warehouse system must be created to provide disaster recovery between SQL03 and an Azure virtual machine named SQL04. You need to recommend an auditing solution that meets the business goals. Which three events should you include in the recommendation? Each correct answer presents part of the solution. A. Transaction Management B. Stored Procedure C. Plain SQL D. Login E. Failed Connections Answer: ABD QUESTION 20 A solution for the data warehouse system must be created to provide disaster recovery between SQL03 and an Azure virtual machine named SQL04. You need to ensure that the performance statistics for the research department are collected. What should you enable? A. Query Performance Insight B. Scale and Configuration C. Dynamic Data Masking D. Index advisor Answer: A Explanation: <https://azure.microsoft.com/en-gb/documentation/articles/sql-database-query-performance/> Lead2pass is one of the leading exam preparation material providers. We have a complete range of exams offered by the top vendors. You can download 70-473 dumps in PDF format on Lead2pass.com. Comparing with others', our 70-473 exam questions are more authoritative and complete. What's more, the 70-473 dumps are the latest. We ensure you pass the 70-473 exam easily. 70-473 new questions on Google Drive: <https://drive.google.com/open?id=0B3Syig5i8gpDLXFjMXZ3dVRNMm8> 2017 Microsoft 70-473 exam dumps (All 51 Q&As) from Lead2pass: <http://www.lead2pass.com/70-473.html> [100% Exam Pass Guaranteed]
