[Lead2pass New Easily Pass 300-360 Exam With Lead2pass Updated Cisco 300-360 Dumps (61-70)

2017 November Cisco Official New Released 300-360 Dumps in Lead2pass.com! 100% Free Download! 100% Pass Guaranteed! I have already passed Cisco 300-360 certification exam today! Scored 989/1000 in Australia. SO MANY new added exam questions which made me headache?.. Anyway, I finally passed 300-360 exam with the help of Lead2pass! Following questions and answers are all new published by Cisco Official Exam Center: https://www.lead2pass.com/300-360.html QUESTION 61When reviewing a design for a voice over wireless deployment, what per-call bandwidth cost should be factored in when determining maximum calls per cell using SIP and G.711u as the codec? A.   64 bytesB.   8 bytesC.   80 bytesD.   10 bytesAnswer: C QUESTION 62Which two factors influence the density of APs in a data-only WLAN environment? (Choose two.) A.   the number of clients that will roam through the facilityB.   the type of controller chosenC.   the defined coverage area and customer needsD.   the number of APs dedicated to voice servicesE.   channel reuse and WLAN bandwidth Answer: CE QUESTION 63Which type of information should be included in an installation report? A.   A complete characterization of the external WLAN environment.B.   The exact number of users the WLAN will support.C.   Soft copies of configuration for switches, routers, controllers, and location appliances.D.   A detailed description of the WLAN environment during the post-installation testing, for example, number of people present, furniture, no furniture, and sources of interference present. Answer: C QUESTION 64Which two pieces of physical infrastructure information should be included in the installation report presented to the customer? (Choose two.) A.   A list of router and switch models, serial numbers and locations.B.   The total square footage of the customer's facility.C.   An analysis of the facility exterior wall and roof construction materials.D.   The cable scan results for the entire customer facility.E.   An installation inventory of all controllers and APs in the WLAN coverage area. Answer: DE QUESTION 65Which two factors influence the density of APs in a data-only WLAN environment? (Choose two.) A.   Channel reuse and WLAN bandwidthB.   The type of controller chosen.C.   The defined coverage area and customer needs.D.   The number of clients that will roam through the facility.E.   The number of APs dedicated to voice services. Answer: AC QUESTION 66When designing and deploying an outdoor mesh network, what is the appropriate RF cell overlap? A.   10 percentB.   15 percentC.   20 percentD.   25 percentE.   Application dependent Answer: E QUESTION 67What is the result if a client radio is incapable of supporting all the 5 GHz channels you have deployed in the controller or APs? A.   You may only be able to deploy 20 MHz-wide channels.B.   This may result in the client having to roam more frequently to find a channel it supports.C.   This may result in coverage holes in the network.D.   You may only be able to deploy 40 MHz-wide channels. Answer: C QUESTION 68If you are calibrating for 2.4 GHz and the site will not be using 802.11 and 802.11b data rates, what should be done to ensure an accurate calibration? A.   Make sure that the access points have the unused rates disabled.B.   Make sure that you are using an 802.11b client when calibrating.C.   Make certain that there are no legacy clients when performing the calibration because they will disrupt the process.D.   Make sure to use a client that supports both 802.11b/g and 802.11a. Answer: A QUESTION 69What two factors could cause a post-deployment audit to show a high retransmission rate for the WLAN? (Choose two.) A.   CRC errorsB.   Rate shiftingC.   CCX compatible clientsD.   High SNR valuesE.   High RSSI values Answer: AB QUESTION 70When designing a WLAN, AP placement is important. How would you rank the density of APs needed to support location services versus data and voice services? A.   Voice and data services both require a higher density of APs than location services.B.   Data services have a lower density of APs compared to location services, but more than voice.C.   Voice services have the highest density of APs over location and data services.D.   Data services have the lowest density of APs compared to location services, which has the highest density. Answer: D Lead2pass 300-360 PDF dumps is perfect! Totally! Thanks so much! 300-360 new questions on Google Drive: https://drive.google.com/open?id=0B3Syig5i8gpDU1VGRGVieEdJWGM 2017 Cisco 300-360 exam dumps (All 94 Q&As) from Lead2pass: https://www.lead2pass.com/300-360.html [100% Exam Pass Guaranteed]
