

# Trainsignal Cisco CCNA Voice Training, 640-461 ICOMM v8.0 Exam

Set yourself apart from other Cisco professionals with a CCNA Voice Certification. Enhance your skill set & learn to deploy a CISCO telephony system for your SMB.

- Lab Setup: Joe takes you through anything you might encounter in the real world when setting up a telephony system. He builds the lab throughout the course so you can see the entire process from start to finish.
- Best Practices: Throughout the course, Joe discusses telephony best practices and things to watch for, including topics like licensing.
- Exam Prep: Will prepare you for the 640461 exam.
